Work Experience

CO-OP Student - Identity Management

Jan. – Apr. 2026

House of Commons Administration

Ottawa, Ontario, Canada

- Created a strategy for upgrading and maintaining the configuration of a secrets manager instance used by multiple teams.
- Developed PowerShell scripts to automate the management of hundreds of regular and privileged user accounts, identifying conflicts in the implementation of role-based access control (RBAC).
- Managed and maintained Microsoft Conditional Access policies to uphold network security.

Cyber Security Designer

Oct. 2024 – Dec. 2025

K2 Enterprise Security Inc.

Ottawa, Ontario, Canada

Part-time consultant (2024, end of 2025) and full-time CO-OP (summer 2025).

- Leveraged platforms including NinjaRMM, JumpCloud and AWS EC2 for efficient system administration, server maintenance, and automation of security tasks, under direct supervision from the company owner.
- Coded multiple projects in Python, PowerShell, and bash scripting to automate administration and auditing, implementing API calls to efficiently retrieve and update information.
- Configured and debugged RHEL instances, working with NGINX, SELinux and CloudFlare.
- Worked efficiently with colleagues to produce effective solutions to bugs, server issues, and client concerns.
